

New modules: PTF-3N-2, PTF-4N-2, and PTF-6A-1

Efficient systems for all applications

The advanced modules are an example of the close collaboration between customer and manufacturer. In addition to a series of standard compartment displays, KBS also offers practice-oriented solutions. In doing so, KBS focuses on innovative technology, intelligent processes, swiftness, reliability and maximum flexibility.

Numeric compartment display with 3-digit quantity indication for vertical installation

PTF-3N-2

H 110 x W 50mm
 Character height: 14mm
 Max. power consumption:
 1 500 mW
 Service temperature: -30°C +50°C

Thanks to the compact construction, this module can be mounted at the rack supports of a pallet warehouse.

Numeric compartment display with 4-digit quantity indication

PTF-4N-2

H 50 x W 170mm, character height: 20mm
 Max. power consumption: 1 600 mW
 Service temperature: -30°C +50°C

Suitable for applications where the quantity to be picked must be legible from a larger distance.

Alpha-numeric text display with 6 digits

PTF-6A-1

H 50 x W 212mm, character height: 20mm
 Max. power consumption: 2 000 mW
 Service temperature: -30°C +50°C

Suitable for applications where the quantity to be picked must be legible from a larger distance as well as for the operator guidance in commissioning stations or for the display of additional information.

The PickTerm elements ensure:

Swiftness The seven-coloured eye-catching lamp is visible from a distance and reduces the time for searching.

Flexibility Even during operation, the modules can be placed at any position.

Reliable inventories Two short travel keyswitches are used for quantity correction.

Efficiency The function key can be assigned freely. It can be optionally equipped with a signal transmitter.

Longevity The OK button is a full travel keyswitch and designed for 10 million picks.
